

Video Surveillance Policy

To ensure the safety and security of all children, educators, parents, and visitors, as well as the security of our daycare facility, Tiny Stars Daycare and OSC is equipped with a 24-hour video surveillance system.

Security cameras have been installed in our playrooms, hallways, outdoor play area, indoor play area and parking lot.

We may conduct video surveillance of any portion of our premises at any time, the only exception being private areas of restrooms, change table areas, and staff room.

Our video/security cameras have been positioned in appropriate places within and around our daycare center facility and are used in order to help promote the safety and security of people and property.

The following are just some of the many benefits of having security cameras installed in daycare centers.

- Security cameras keep children and childcare educators safe. They are a very effective deterrent of any crime.
- People tend to behave/perform better when there are security cameras around.
- Executive Director and Program Director can better monitor the entire facility and supervise/observe educator's interactions with children and with other educators effectively.

- Our daycare cameras help provide peace of mind to our parents and our educators. Because we respect the privacy of all children, parents, and educators in our daycare center, our 24-hour video surveillance system/ security cameras are for internal purposes only. ONLY the Executive Director, and Program Director, or licensing officers if requested are allowed to view our security cameras/ video footage at the Center's office at the site. Footage is kept on site only.

Video surveillance/recording consent forms are signed prior to your child (ren) enrolling at our daycare center and are a condition of enrollment.
